# MARCELO ALBUQUERQUE

I am a petrophysicist with a unique combination of skills in applied machine learning, statistics and reservoir engineering. I am passionate about analyzing and extracting value from data, using exploration and visualization tools and deploying solutions for business problems.

Currently searching for a position that allows me to build tools leveraging a combination of visualization, machine learning, and software engineering to help people explore and understand their data in new and useful ways.

🎓 EDUCATION

2020 | 2018

MsC, Computer Science
UFRJ

📍 Rio de Janeiro, RJ

· Master Thesis: Prediction of Petrophysical Properties Using Machine Learning and Hierarchical Multi-Task Linear Models

2008 | 2003

B.S., Electronics Engineering
ITA

📍 São José dos Campos, SP

· Diploma Thesis: Applications of Time-Domain Back-Projection SAR Processing in the Airborne Case
💼 INDUSTRY EXPERIENCE

Present | 2018

Data Scientist
Petrobras Research Center

📍 Rio de Janeiro, RJ

· Develop Machine Learning models to predict Petrophysical Properties
· Build REST APIs and python/R packages to access and explore petrophysical data
· Enhance data storage and image processing workflows for microtomographic images
· Design petrophysical data visualization tools and web apps
· Develop reservoir simulation python packages to deploy and update petrophysical models using history matching bayesian methods

Present | 2015

Petrophysicist
Petrobras Research Center

📍 Rio de Janeiro, RJ

· Coordinate the execution of Routine and Special Core Analysis (SCAL) data gathering for pre-salt and other strategic fields of Petrobras
· Analyze SCAL experimental data and provide meaningful petrophysical rock parameters for reservoir simulation
· Simulate and research physical phenomena and improve data acquisition methods

LANGUAGE SKILLS

| Python |
| R |
| SQL |
| Julia |
| Javascript |
| Bash |

Made with the R package
pagedown.

Last updated on 2022-07-31.

2015 | 2010

Reservoir Engineer

Petrobras

📍 Aracajú, SE

· Reservoir Engineer at the Sergipe-Alagoas Business unit (UO-SEAL)
· Management of mature oil and gas fields in the Sergipe Alagoas basin
· Oil Field Production and Reserves forecasting with analytical and numerical simulation tools (CMG Software Suite)

2010 | 2009

Petroleum Engineer

Petrobras

📍 Salvador, BA

· Petroleum Engineering in-company specialization at Petrobras University

2008 | 2008

Engineering Intern

Orbisat

📍 São José dos Campos, SP

· Developed a point-target simulator for a ground-based weather radar, using Synthetic Aperture Radar concepts
· Supported the software development team evaluating and implementing radar signal processing algorithms in IDL

🖥 RESEARCH EXPERIENCE

2007 | 2007

Diplomand Researcher

Deutsches Zentrum für Luft und Raumfahrt (DLR)

📍 Munich, DE

· Implemented a Synthetic Aperture Radar (SAR) processor in IDL and C / pthreads
· Investigated and developed applications of time-domain SAR processing: direct-geocoding and processing of curvilinear acquisition trajectories
· Researched a novel SAR acquisition geometry
· Circular SAR"

📖 PUBLICATIONS

2018 | 2018

Estimation of Capillary Pressure Curves from Centrifuge Measurements Using Inverse Methods

Rio Oil & Gas

· Authored with Felipe M. Eler, Heitor V.R. Carmargo, André L.M. Compan, Dario A. Cruz and Carlos E. Pedreira.

2008 | 2008

Applications of Time-Domain Back-Projection SAR Processing in the Airborne Case

European Conference on Synthetic Aperture Radar

· Authored with Pau Prats and Rolf Scheiber
